📰 Recent news

No relevant news found in the last 30 days.

📋 What the role needs

- At least 5 years in Product Design Must-have
- Proven experience designing digital products end-to-end Must-have
- Deep understanding of interaction design and UX principles Must-have
- Understand modern component-based frontend applications Must-have
- Strong command of Figma and related tools Must-have
- Native-level German and fluent English skills Must-have
- Degree or training in a relevant field Nice-to-have

✅ Your match

- **At least 5 years in Product Design** Strong
  "Product designer with 5 years of experience designing B2B SaaS tools for operations and data teams."
  The evidence shows 5 years of relevant experience in Product Design within a B2B SaaS context.
- **Proven experience designing digital products end-to-end** Strong
  "Led the redesign of the workflow builder used by 4,000 operations teams, which reduced setup time for new automations by 35%."
  The evidence demonstrates end-to-end design experience by leading a significant redesign project.
- **Deep understanding of interaction design and UX principles** Strong
  "I combine user research, interaction design, and prototyping to turn complex workflows into simple interfaces."
  The evidence indicates a deep understanding of UX principles through practical application in design.
- **Understand modern component-based frontend applications** Partial
  "Worked daily with engineers, product managers, and data analysts in a cross-functional squad."

The evidence shows collaboration with engineers but does not explicitly demonstrate understanding of component-based applications.

- **Strong command of Figma and related tools** Strong
  "Built and maintained the Figma design system with 120 components, used by 3 product teams."
  The evidence clearly shows strong command of Figma through practical experience in maintaining a design system.
- **Native-level German and fluent English skills** Strong
  "German (native), English (C1)"
  The evidence confirms native-level German and fluent English skills, meeting the language requirement.
- **Degree or training in a relevant field** Strong
  "M.A. Interaction Design, Berlin University of the Arts (2020)"
  The evidence shows a relevant degree in Interaction Design, aligning with the educational requirement.

⭐ Projects to highlight

- **Prompt Review Board**: Concept for an internal tool to compare AI outputs.

🎯 Prepare before the interview

- **Understand modern component-based frontend applications**
  Review documentation on component-based architecture and React/TypeScript.

💬 Likely interview questions

1. Can you describe your experience with component-based frontend applications and how you collaborated with engineers on such projects? (Understand modern component-based frontend applications)
2. What specific methods do you use in Figma to ensure design consistency across multiple teams? (Strong command of Figma and related tools)
3. How do you think your experience with AI-assisted products will contribute to Packmatic's goals? (Company background and role relevance)
4. What steps are you taking to improve your understanding of component-based frontend applications? (Understand modern component-based frontend applications)
5. Can you share an example of a complex problem you solved through your design process? (Experience in product design and UX principles)

🔎 Similar employers in Germany

- **Forte Digital GmbH**
  They are also focused on B2B SaaS product design, similar to Packmatic.
- **JTL Software**
  They are a leading software company in Germany, hiring for similar product design roles.
